CLASSIFICATION LIST

EXPLANATION

This classified List of Chrysanthemums cancels all previous Classification Lists and is issued as a guide to persons arranging chrysanthemum shows, and to the Exhibitors and Judges at those shows.

It is not a complete list of all cultivars available but rather a selected range of cultivars for each Section.

This List is issued by the NZNCS as the current master list effective from February 2023

The Classification List should be read in conjunction with the Show Regulations as published in the Show Schedules.

The following rulings and points of clarification only apply to the NZNCS Shows:

1 The Classification List of the NZNCS should be binding on Affiliated Societies and Clubs in New Zealand.

2 All exhibits will be shown as per this Classification List, with the exception that a Medium Exhibition may be shown 'Up' as a Large Exhibition if the cultivar attains a size suitable to the Large Exhibition type.

3 a. Any cultivar not recorded in this Classification List may be exhibited as most recently classified.

b. If the cultivar is not on any previous list or is an import, the classification of the country of origin should be used until the Classification Committee can view blooms grown in New Zealand.

c. An Exhibitor may show a seedling cultivar in the Seedling Class or in the class that the Exhibitor considers appropriate. An Exhibitor may show a seedling at a local show as well as the National Shows in the same year.

(Management Committee 9 Feb 2004)

d. No cultivar will be barred or judged Not As Schedule (NAS) because of its classification as an Early Flowering or Late Flowering cultivar in relation to the show at which it is being exhibited.

Please note that Sections 5 and 6 have been combined into one Section, Section 5 Intermediate Decorative. This applies to the North and South Island Shows.

Amendments, as approved and classified by the NZNCS Classification Committee, will be notified on an *Amendment Sheet* and will be forwarded to Members in association with future editions of the *Newsletter* or *Year Book*.

This Classification List, plus Amendment Sheets, are to be considered *current* until such time as it is deemed necessary to reprint the entire list as a new booklet.

If an Exhibitor has any doubts about the Classification of any Cultivar they should consult a member of the Classification Committee or a senior exhibitor, do not guess.

All the named classified cultivars are divided into *Sections* presenting common characteristics.

Mid-Season cultivars, previously indicated separately, are now included under the single heading, 'Late Flowering' as below:

LATE FLOWERING

Section

- 1 Large Exhibition**
 - 2 Medium Exhibition**
 - 3 Exhibition Incurve**
 - 4 Reflex Decorative**
 - 5 Intermediate Decorative**
 - 7 Single**

 - 24 Reflex Decorative**
 - 25 Intermediate Decorative**
 - 29 Sprays**

COLOUR CODING

The following codes represent the colour of each cultivar.

It is accepted that the code allocated is an indication only of the colour area or category in which the cultivar falls. In some instances the colour is used, for example in Large Exhibition, where colour awards are made at a National Show.

- B** Bronze
Lb Light Bronze **Db** Deep Bronze
C Cream
G Green
P Pink **Lp** Light Pink **Dp** Dark Pink
Pu Purple **Lpu** Light Purple **Dpu** Deep Purple
S Salmon **Ls** Light Salmon **Ds** Deep Salmon
R Red **Lr** Light Red **Dr** Deep Red
R/B Red/Bronze
W White
Y Yellow **Ly** Light Yellow **Dy** Deep Yellow
O Other colour

LARGE EXHIBITION

SECTION ONE

A large exhibition bloom with reflexing florets should have breadth and depth in equal proportion, possess good "shoulders" and be full in the centre. The florets should reflex gracefully and be of good substance, either flat and broad or quilled; they should be brilliant in colour, unspotted by dampness, and fresh to the tips. Cultivars with incurving florets should have breadth and depth in equal proportion and be full in the centre. The florets may incurve either closely and regularly or loosely and irregularly, but in either case should form a bloom globular in outline. Florets should be broad, brilliant in colour and fresh to the tips.
